The Best Part of Me

A project of Hale & Edison Elementary Gifted & Talented 4th Grade Students inspired by Wendy Ewald’s book
I love my ear. My ear helps me hear. Even if I could not see, I could still hear. I like to listen to Beck and Bro Jack.

Jaydon
I love my hair. It is very long and I have been growing it out for years. It may be short to some people but it is long for me. It is straight, long, healthy, beautiful and black. Just like my sisters, mom, dad, grandpa, grandma and, my whole family. I like to put my hair in braid and tie it up into a ponytail.

Kaydee S.
The best part of me is my head. It holds my brain and my hair and I really like my hair and my brain and without my brain I would not be alive! I can roll my head and that feels the best. My head also holds my knowledge and my favorite hat!

Auden S.
The best part of me is my hands
My hands are good for writing, swimming, 
And playing. I like to play Basketball. I need 
My hands to shoot. I like to swim. I need my 
Hands to stay above water. I need to write 
Paragraphs for homework. I need my hands 
To write letters. These are some things I need 
My hands to do.

Sallu C.
My nose is weird but without it I wouldn’t be able to smell the beautiful smell of life. But I hate it when it is stuffed.

By Brett D.
My hands

Without my hands I can’t touch, feel, and write. I couldn’t take tests or a quiz. I need my hands for lots of things like I need to wash them, and plus if I didn’t have hands I could have never written this. My hands can hold my food, they can pet my dog, they can type on the computer, and they help me read.

By: Ridge H
Brain

Brain you are smart. You help me think, without you I don’t know what I would do. I love to read. I use my brain to read. I love to play. I use my brain to play.

Wesley M.....
The best part of my body is my legs because if I did not have any legs couldn’t play, run, walk, or even move that's why legs are the most important part of my body also they help me when I play sports like basketball, soccer, baseball, don’t forget swimming that’s also why I chose legs.

Braden B.
My Eyes

think my eyes are the best part of me. It is one of the only things you can’t replace. You can replace your feet, legs, hands, and even hair. Sure, there’s cameras, but where’d you put them? My eyes are blue and green. They sometimes seem to pop out, or their pupils are huge. Without eyes, we’d have such a hard life. And those who are blind, still do amazing things. So it is a miracle for those who can see.

William
I think my mind is great for me because it controls me. It's a great thing for me and it helps me choose to remember things. It gives me a great memory on things I need to do and I try to control my temper.

Zachary L
I chose my chest because it’s taken a lot of falls and I keep falls and scratches as memories of trips that I went to. Like Hawaii, I slipped on a rock and got scraped, that’s how I remember the beautiful ocean. That’s why my chest is the best part of me.

Bradley C.
I like my head because it let’s me think about my favorite stuff like my family gt and video games. Also it let’s me see, breath, smell, and hear and it helps me read, walk, talk, eat, play, and party that’s why it is my favorite part of my body.
I like my arm because I like to play outside with my arms. I also like to play on my swings and finally, I like to play video games. Without my arms, I wouldn't be able to do any of those things.

Angel E.
I love my freckles. The reason that I like them so much is because I have so many (They are so small!), and my mom has a ton of freckles as well. I think that my freckles are the thing that stand out most about me. They are the best thing about me.

October K.
Hands can pick some paper up and you can punch in boxing or for no reason. Without hands, you can’t do important stuff. Like doing a test or hold a box. Hands are very important work. Also it can help you type on a computer or write on some paper. Hands can do important stuff. So that’s why hands are my favorite body part.

Ty H.
My eyes. They may not be perfect but without them I cannot see. They are special. A blueish greenish tone. When I was little they were good. But then I failed a special test. All the colors are divine, but they are all now mine.

Reese
I like my fingers. Without them I could not feel the warm texture of a blanket, or the soft sand when playing in the sand box. I write with them and draw with them and they are useful in many ways. They are long and don't break easily.

Tyler
The best part of me is my arms because I can use them to write, throw, and other things. The other things are picking up stuff, pointing at toys you want at the store, and feeling leather.

Lane
The best part about me is my face. My face has a lot of freckles. I like my mouth and my eyes. Their big and blue like a butterfly. I like my nose that smells great things not toes. My smile is the best part of my face. It smiles so big you can hardly see my face.

Allison M.
The best part of me is my brain because it holds all my knowledge. If I didn’t have it, I wouldn’t be able to learn and collect knowledge when I am in school. My brain is unique because it can hold as much as it wants. You make me have grit.

Eve D.
The left side of my brain is the most important part because its my side I do all of my focusing on work. It has me do more work on than the right. I do more science in school and more work like homework.

Caleb B.
