

What's the 4-1-1?

Mesa Public Schools offers many ways for parents to stay tuned in to their kids, their campus and their school district.

Using our convenient online systems, you won't miss out on important information and good news.

Mass communication system

The district has a mass communication system that allows us to broadcast targeted voice and email messages. From attendance notices and school events to emergency communications, this system helps us keep you well-informed.

Be sure to provide current phone numbers and an email address to the school office. Next school year, we'll use a new system that features enhanced capabilities, including text messaging.

Parent portal

MyMPS, our parent portal, provides access to your child's profiles. Check attendance or grades (junior high and high school), and change your contact or emergency information online. If you haven't set up a portal account, stop by the school office for your activation code.

Pay and donate

Do you need to pay for Kids Corner, a camp or a field trip? Would you like to make an extracurricular activity donation? Do it online! To help get you started, look for your adult ID and password in this summer's mail-in registration packet.

If you already have your portal account set up, you'll find your adult ID on your "My Account" page just above your email address. Follow the password directions to set up your online pay-and-donate account.
