

Wrapping Text around an Image

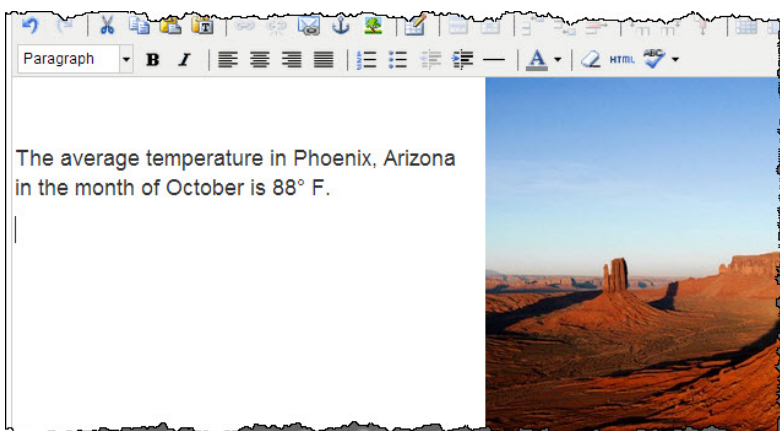

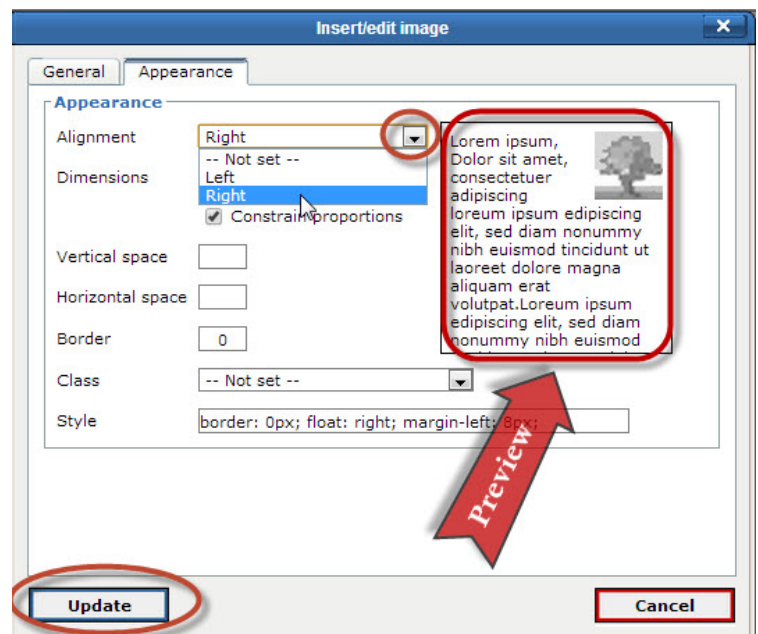

When you upload an image into Architeck, you may notice that it doesn't look quite right. Most of the images we see on websites and in print media utilize wrapping the text around images. This is also available within Architeck. (1) Click on your image so that it is highlighted. (2) Click on the **Insert/edit image** icon.

Select the **"Appearance"** tab.

Click on the drop-down to the right of **"Alignment"** and select either **Left** or **Right**.

When you make a selection, you get a preview of what the image would look like with the text wrapped around it.

Once your decision is made, select **"Update"** from the bottom left corner of the **Insert/edit image** window.

The image now appears with the text wrapped around it. Remember to select **"Publish"** to save your work.
