

This tutorial will help you to embed a YouTube Video on your Smart Page.

Embedding a Video already in Architekt:

- Select “**Edit Page**” from the Architekt toolbar at the top of the page.

- When the screen refreshes, you will see lightly shaded blocks with the words “**Add content...**” on your page. To begin editing, simply click in any one of the boxes.

- In the **Add Content** window, select “**Media**” and then select “**Video.**” Select “**Create.**”

- In a new tab or window, navigate to the YouTube video that you wish to use. Highlight the URL and then **copy** it (Ctrl + c).

- Navigate back to the tab or window for your Smart Page. In the Edit Content window, paste the URL for the video. You have the option to add a title for the video. Select “**Update.**”

- Your video now appears on your Smart Page. Be sure and select “**Publish**” from the Architekt toolbar at the top of the page to save your work.

Note: Currently, once the video has completed playing, you will have no control of the “related videos” that may appear.
