

# Create a Video Feed Page

*In order to have permissions for a video or audio feed page, you must first take an advanced Architekt class through Professional Development. When you have completed the class, you will be able to create video and audio feed pages.*

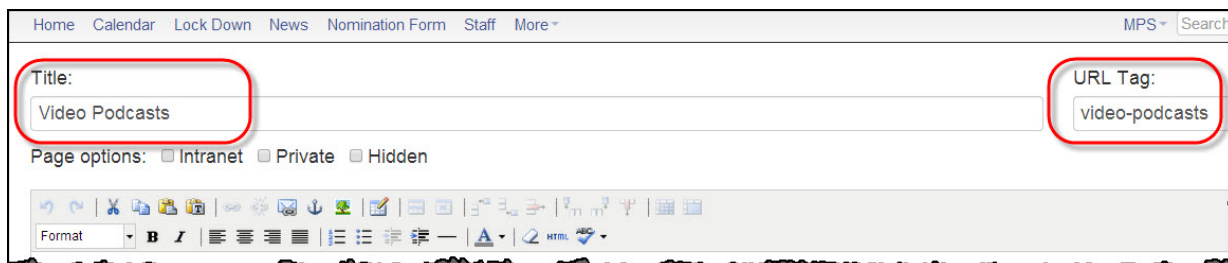

Select “**New Page**” from the Architekt toolbar at the top of the page.

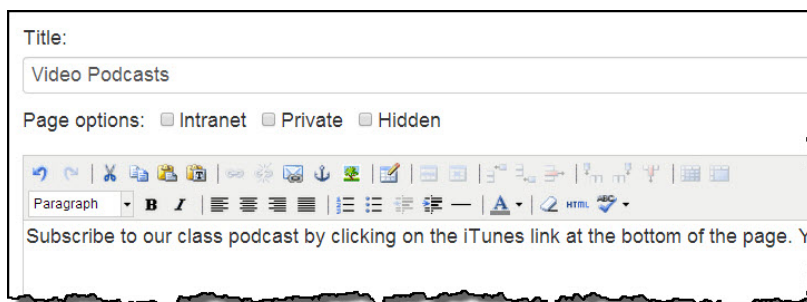

Select “**Blogs and Feeds**” and then select “**Video Feed.**”

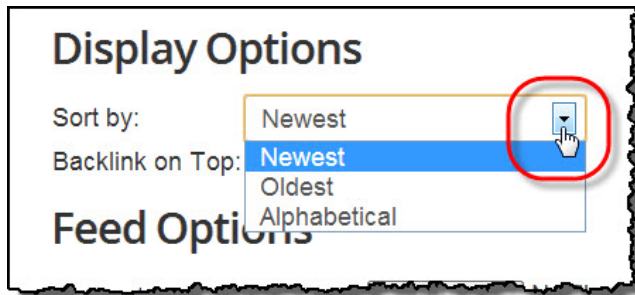

You must type in a **Title** and a **URL Tag** for your page.

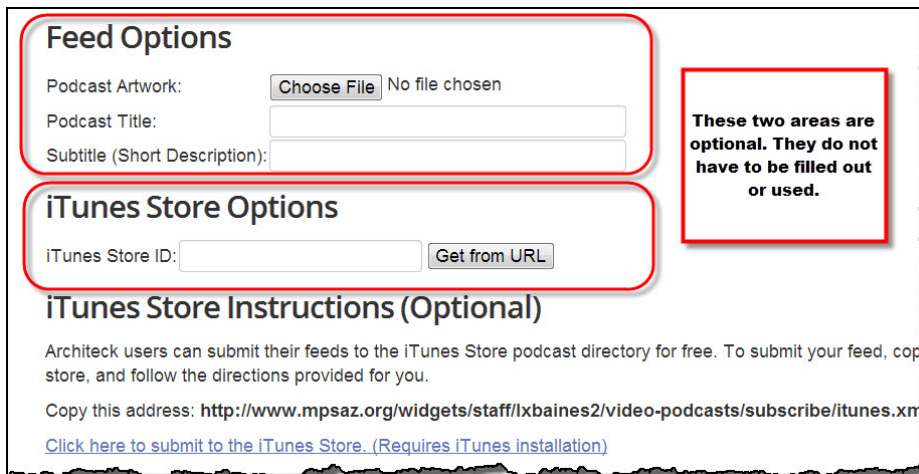

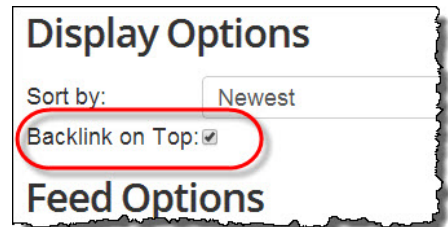

You have the option to type in a description of your video feed in the workspace provided.

In **Display Options**, you can set the default view sort by clicking on the drop-down arrow and making a selection.

You can also choose to have a back-link at the top of your video feed page. To do this, simply click in the box.

Optionally, you can choose to add Podcast Artwork and a title to your podcast.

If you want to upload your podcasts to the iTunes store, complete the information at the bottom of the page.

Select **"Publish"** from the Architeck toolbar at the top of the page. Your video feed page has now been created.
